

## NURTURING ENVIRONMENTAL STEWARDSHIP IN OUR CHILDREN AND FAMILIES

April 25, 4pm, Zoom

**Earth Day turns 51 this year!**

The Catholic Church brings a distinct perspective to the discussion of environmental questions by lifting up the moral dimensions of these issues. This unique contribution is rooted in Catholic social teaching calling us to care for creation.

Pope Francis' encyclical, *Laudato Si'*, provides us with guidance for protecting our common home: Earth. In celebration of the anniversary of Earth Day, the Green Team, a Social Justice subcommittee, and Faith Formation are offering the opportunity to explore how everyone – adults, children, families – can more meaningfully engage in actions that protect the environment and discover ways we all can encourage a love of and respect for nature.

Our presenter will be **Laura Anderko, Ph.D. RN**, a professor at Georgetown University's School of Nursing & Health Studies. A scholar and educator in the fields of public health and environmental health, she has studied a variety of environmental health topics including climate change and its impact on children. [RSVP](#)

**All are welcome!**
